

## Unit Test for Login

Name: Mohamed Elattma

### Equivalence Classes:

1. Login
  - a. Successful → go to the user's club page
  - b. Unsuccessful → do not log in, since the user is invalid
2. Logout
  - a. Successful → log the user out and navigate back to the login page
3. Sign up
  - a. Navigate to the sign up page to create a new account

Equivalence Class	Data	Warnings/Errors?
1	A username and corresponding password, followed by a press of the login button	No. Unfortunately no error appears to the user saying that the username and password does not match or whether such a user exists
2	Pressing the logout button located at the top left of the user profile	Nope, logs out and navigates to log in
3	Pressing the 'Sign up' button	Nope, navigates to sign up
