1. New User
 - a. User is new and has no notifications
 - b. User is joining a club as member
 - c. User is joining a club as admin
2. User wants to join a club
 - a. User wants to join a club as admin
 - b. User wants to join a club as member
3. User is a potential new person in club
 - a. User was added as an admin of club
 - b. User was added as a member of club
 - c. User was rejected as a admin/member

Equivalence Class	Data	Warnings/Errors?
1	N/A, User just click on notifications tab	Nope - "Welcome to Clubster!" message appears
2	Outside user taps Join as Club/Join as admin	Nope- Message saying "{name} wants to join {club} as admin/member"
3	User taps accept/reject of outside user	Nope - message saying "You have been added as admin/member" comes if user accepts. If user declines, appropriate rejection message comes to outside user.
