Profile Unit Test
Performer: Adnan Yunus

Equivalence Classes:
- #1: No club data is set
    - User is a new member, and hence hasn't even submitted data
    - User is a member of application, but hasn't set up his/her profile
- #2: User wants to see his/her profile data
    - User wants to modify existing club data
    - User is a member of application, but hasn't set up his/her profile

Equivalence Class	Data	ProfilePhoto	Warnings?/Errors?
1	Sample - { major: cs, Hobbies:guitar,cs, Links: { Facebook: 'www.facebook.com'' } , Description: 'I love cookies and bananas' }	Switched profile photo from pre-given url to one in google storage	None-The output was exactly as behaved. The data gets updated in our mongodb shell and is shown in the frontend as well
2	Sample - { major: bio, Hobbies:running,cs, Links: { Facebook: 'www.facebook.com'' } , Description: 'No more sugar for me' }	Switched profile photo from pre-given url to one in google storage	None - behavior is as expeceted. The GET request appropriately retrieves the fields if user taps on tab. When user changes data or profuile photo, everything comes as prepared.
